Today we're announcing a new product release from Blockout Blinds, our new Timber Venetian Blinds range.

Blockout Blinds introduces a new product to their line of window treatments, the Abachi timber Venetian blind. Now customers have a wide variety of choices when it comes to picking out the perfect window coverings for their homes and offices. The Retro

Collection of the Abachi Timber blinds comes in 10 colours and the Passion Collection comes in 12 colours. Finding a Venetian blind to go with any interior space is easy now.

Colour Schemes to Go With Any Decor

Timber Venetian blinds come in a total of 22 different colours to offer a wide variety of choices. Choose from rich ebonies, warm mahogany, crisp smooth creams, and lovely weathered wooden tones. Find a wood grain colour to match any interior design from sleek and modern contemporary to traditional and antiqued.

New Specifications Give Depth to the Timber Venetian Blinds

Transform any room with the addition of timber Venetian blinds over the windows. These new blinds have a woven ladder tape that adds depth and dimension to the blinds. This tape comes in two optional sizes, in 16 mm or in 30 mm. The woven ladder tape runs vertically aiding in the operation of the wooden slates, giving the blinds a nice finished look.

Timber Venetian Blinds Are Easy to Use and Environmentally Friendly

The new timber Venetian blinds are made from renewable wood, which makes them extremely light. Because they are lightweight, they are very easy to operate. Older style Venetian blinds may be difficult to raise and lower or even to open and close. These

new blinds raise and lower, open, and close with ease. This makes them a popular choice of window treatments for many home and business owners.

Timber Venetian Blinds Window Treatment Options

Because these timber Venetian blinds come in so many colour choices, it is easy to find just the colour to suit most interior designs. The blinds look great as the only window covering, offering complete privacy when the blinds are shut. Windows are easy to decorate with additional coverings if desired. Timber Venetian blinds look great under see through sheers. Add a valance or a scarf to match other colours or furniture within the room. Timber Venetian blinds can even go well with curtains and drapes.

Conclusion

Timber Venetian blinds go well on all sized windows, offering privacy, blocking sunlight, helping to keep the heat out in the summer and the cold out in the winter. The sleek design of the blinds is easy to care for, clean with a dry cloth or a gentle sweep of a vacuum attachment. The ease of operation and the styling makes them a popular choice of window coverings for many homes and offices.

We hope you've enjoyed this news and tips update from Blockout Blinds, we'd love for you to leave a comment about our new product release for "**Timber Venetian Blinds**".
